About the Clockmakers' Buying Guide

The Clockmakers' Buying Guide is a where-to-buy-it directory compiled especially for clock repairmen — or anyone who makes or repairs clocks. It is an indispensable tool, bringing together, for the first time, hundreds of resources in one convenient publication.

In addition to listing the range of clock materials available from large suppliers, the Guide specializes in the lesser-known suppliers who can provide unusual and hard-to-find parts and services.

How often have you been stymied because you didn't know or couldn't remember where to obtain a certain part or repair? Now you will find the supplier in the Clockmakers' Buying Guide.

CBG has been in operation as a where-to-buy-it service for several years and during this time has assembled hundreds of suppliers' names and answered more than fifteen hundred requests for information. Many members of the National Association of Watch and Clock Collectors who are suppliers have made themselves known to the **Guide** as a result of advertisements in the Association's MART. Other NAWCC members, thoughtful of their fellow men, have given us the names of suppliers with whom they are familiar.

This edition is compiled from all of the information in our files at the time of publication, with these exceptions:

1. We have not attempted to list everything available from the suppliers who publish catalogs (Section 6).
2. We have had to limit the number of listings of the most commonly used parts and services. These are usually found in the larger clock material suppliers' catalogs (Section 6), or are available from watch material dealers who carry clock parts (Section 7).
3. The **Guide** does not list **watch parts, watch repair services, or tools**, as the demand for these is adequately met by watch material dealers and the larger clock material suppliers.
4. We have not included suppliers whose business policies we have found from experience do not meet the **Guide's** standards.

The **Clockmakers' Buying Guide** will do everything it can to keep its information as accurate and up-to-date as possible and plans to issue revised editions as needed. If you have ideas, suggestions, or corrections, we would like to hear from you.

The success of CBG depends on the cooperation of its users and suppliers and the accuracy of its information. Please help us by using the centerfold postcards.

Charles Terwilliger
President
Clock Trade Enterprises

Guidelines for users

2

The Clockmakers' Buying Guide will solve many knotty problems for you. After you consult the alphabetical listing in Section 4 to find the part, service, or repair you wish to obtain, and select a supplier, whose full name and address you will find in Section 5, there are many suggestions in these guidelines that will expedite your dealings with him.

We recommend that you read this section carefully for the most effective use of the Guide.

1. When you write to a supplier, do not expect him to read your mind. Take time to explain what you need *clearly* and *in detail*. Furnish a rough drawing if you think it will help.
2. Always enclose a SASE (Self Addressed Stamped Envelope) when you ask a supplier for information. Many smaller suppliers are one-man operations, with little clerical help or time for correspondence.
If you do not enclose a SASE, please don't report to us that the supplier has not been responsive.
3. If you have requested information from a supplier, enclosing a SASE, and haven't received an answer in 15 days, please use one of the postcards bound in the center of the **Guide** to report his name and address, the date you wrote to him, and any other details. If we receive a sufficient number of similar complaints, the supplier's name will be removed from our files and the next edition of the **Guide**.
4. Do not send any part of a movement or case to a supplier *until he asks you to do so*. If an unsolicited article is lost, it is *your* responsibility.
5. If a supplier has asked you to send a part for an estimate of the cost to replace or repair, and you decide not to accept his estimate, send him a minimum of \$2.00 (more if warranted) to cover the cost of packing, postage and insurance for its safe return to you. Don't expect the supplier to spend his money on your problem.
6. Don't use the words RUSH or PLEASE RUSH on your order, or ask for special treatment because you have a special problem. Everyone wants his order filled as quickly as possible; the policy of most suppliers is to handle jobs in the order they are received.
7. It is your responsibility to pack and ship a part, assembly, movement, or clock so that it will not be damaged in transit. Pack the shipment to withstand the roughest treatment you can imagine — such as being thrown from place to place, or being on the bottom of tons of packages.
 - Use a sturdy box and *clean* packing material. Never use excelsior or shredded newspaper. If the article is delicate, put the first box, surrounded again by packing material, in a larger box. Seal with strong tape.
 - Send articles of any value by United Parcel Service or insured parcel post; first class mail cannot be insured.

Guidelines for Users

- Special Handling added to insured parcel post means faster delivery, *not* more careful handling.
- Special Delivery is of questionable value, useless if the address is a post office box.
- Labels such as FRAGILE, GLASS, HANDLE WITH CARE, PLEASE HAND STAMP do not take the place of careful packing. If an article has been packed carelessly and without consideration of the damage that can occur in shipping, the supplier is perfectly justified in returning it to you in whatever condition it was received without further responsibility.

8. If you refer to a previous purchase from a supplier, always give the date and number of his invoice.

9. If you ask for information about something unrelated to your order, put the question on a separate sheet of paper with your name and address; include a SASE and you might get your answer by return mail.

10. Don't object if you are asked to pay in advance, regardless of your credit standing. Be glad you have found someone who can provide what you want. Keeping credit ledgers and sending bills is a costly, time-consuming and unnecessary expense for suppliers.

11. Because of the cost of processing an order, many suppliers request that purchases be over a certain minimum. Don't expect a supplier to fill an order for a 35¢ click spring. Order other things you can use to make the amount of the order worth his while.

If you need a part or service that is not listed in the **Guide**, explain your need **in detail** in a letter to CBG and enclose *two* first class letter postage stamps — two first class stamps for *each* need. Suppliers are being added to our files daily; it is possible that a supplier from whom we heard after this edition was published may be able to provide what you want.

Please remember, however, that CBG has no names of suppliers for *original parts for out-of-production* clocks other than those listed in the **Guide**. The **Guide** does list suppliers who make reproductions of some of these parts, or who will remake or repair them.

Guidelines for Suppliers

3

The Clockmakers' Buying Guide will increase the volume of business of its listed suppliers by making their services known to many more prospective customers. If you want your share of this increased business, observe these guidelines.

1. If you receive a request for a clock part or service for which you are listed in the **Guide**, *and the request is accompanied by a SASE (Self Addressed Stamped Envelope), please answer the request within 10 days of its receipt.*

If the part or service is not immediately available, use the customer's SASE to tell him so, and to tell him when you can respond, or when he should write to you again. If you tell him you will write later, do not fail to do so.

2. When estimating the time required to complete a transaction (the time expected for a back order to be filled, or the time to complete a repair), *be realistic*. Don't encourage your customer to believe that his order will be completed sooner than you know it can be. If you have legitimately underestimated the time involved, it is your responsibility to inform your customer promptly and give him a new delivery date.

If the **Guide** is to be of value to its users, the suppliers it lists must be prompt, accurate and responsible. The names of suppliers who do not respond to CBG users' SASE requests, or who fail to inform users of the correct amount of time necessary to complete a repair or service, or who repeatedly give inaccurate delivery dates, will have to be removed from CBG files and from future editions of the **Guide**.

Please send us your comments about the **Guide**, and your suggestions about how it can be improved. If the items you handle or the services you perform have been omitted, or incorrectly listed, or if you have added new services, or have moved, please tell us immediately so we can add the information to our files and include it in the next edition of the **Guide**.

CBG's files are used daily to reply to the numerous inquiries we receive about parts and services; it is important that we have the correct information about you and what you have to offer.

4

Clock Parts, Services, & Repairs

Look for the part, service, or repair you need in this alphabetical listing.

If you cannot find the item immediately, look for other versions of the name, or in similar categories. For instance, if you need a convex beveled glass crystal, you will find it under **Crystals, beveled glass, convex**.

If your need is a part for a "name" clock or movement, look under its generally accepted name — **Atmos, Herschede, Morbier, Seth Thomas, etc.**

Suppliers are identified in this section by only one or two key words of their names and the state in which they are located. These key words are in **bold type** in Section 5, the alphabetical listing of the full names, addresses and zip codes of all suppliers.

Be sure to check the meaning of the notes (a letter in *italics* by a listing or supplier name) in the "Key to Notes" at the end of this section. These notes give important additional information.

Key to Notes

- | | | |
|--|---|--|
| (a) Give possible range of diameters for largest and smallest bell, also maximum and minimum length of entire nest. | (j) Each job requires individual estimate. Send door or case only. If you do not accept estimate, send \$3.00 for return packing and insurance. | (s) No shipping. Must be delivered and picked up at midtown New York City office. |
| (b) For 400-Day clocks only. | (k) Fine English and Continental only. | (t) Send SASE for names of repairmen in your area. |
| (c) For Horolovar reproductions only. | (l) No repairs, but if you explain the problem clearly and include a SASE, will try to suggest a solution. | (u) Must see to estimate. If you do not accept estimate, send \$2.00 for return packing and insurance. |
| (d) Supply accurate cardboard template of size required. | (m) Minimum quantity purchase required. | (v) American made. |
| (e) Ask whether required convexity or curvature is available. | (n) Not including modern pendulum fit-ups. | (w) Fast service impossible. |
| (f) Each job requires individual estimate. Send bezel only. If you do not accept estimate, send \$2.00 for return packing and insurance. | (o) Specializing in reproductions of parts for antique English clocks. | (x) Movements can be removed and used as replacements. |
| (g) German only. | (p) Precision work only. | (y) Write for name and address of nearest distributor. |
| (h) Specify amount of bevel required. | (q) Antique only. | (z) Maximum 3½" diameter. |
| (i) Larger sizes than those normally carried by catalog houses. | (r) For nearest Nutone authorized service center, call toll free number 800 — 543-8687. In Ohio, call 800 — 532-2030. | (aa) No parts available for out-of-production clocks. |

7

Watch Material Dealers Who Carry Clock Parts

There are over 100 members of the Watch Material and Jewelry Distributors Association, but a lesser number carry **clock** material — and they usually carry only the most commonly used items.

Most of the dealers listed here publish catalogs of clock material and supplies (available for about \$2 each)
